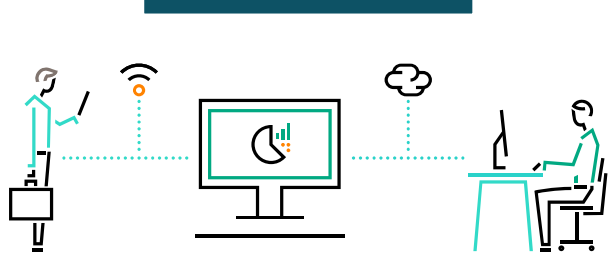
HPE GreenLake

3 keys to the power of storage as a service

Challenge

Data is the life force of the modern enterprise; it powers the next-gen operating and business models that move you forward, faster. But to accelerate your data-driven modernization, you need to eliminate the infrastructure complexity and silos—across edge to cloud—that slow you down.

Solution



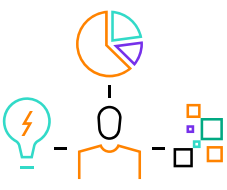
Storage as a service brings the speed and agility of a cloud operational experience to apps and data everywhere—empowering you to transform from IT operator to service provider, align storage with business demands, and focus on managing outcomes, not infrastructure.

1. **Simplify operations with cloud agility**
Move faster with a cloud experience that shifts operations from infrastructure centric to app centric.

2. **Consume flexibly as a service, on demand**
Stop managing infrastructure and start simply accessing and utilizing it.

3. **Run any app—without compromise**
Meet any SLA, from traditional to modern apps, with the right performance, resilience, and cost.

Transform faster with HPE GreenLake for storage



HPE GreenLake for storage helps eliminate storage complexity with a cloud experience everywhere, freeing you to simplify operations and move faster. It brings together the agility of cloud operations, consumption as a service and on demand, and the freedom to meet any SLA without compromise.

Go faster with self-service agility

HPE GreenLake for Block Storage is the industry's first storage as a service that offers self-service and a 100% availability guarantee built-in for mission-critical environments.[8] It simplifies on-prem storage with SLA-driven quoting and ordering, and AI-driven self-service provisioning for line of business and DBAs.
